## Directors' Review

On behalf of the Board of Directors, we are pleased to present the Directors' Review of Soneri Bank Limited ('the Bank') along with the un-audited condensed interim financial statements for the nine months ended 30 September 2017.

#### **Economy**

The outgoing quarter Jul-Sep'17 started on a promising note with Large Scale Manufacturing (LSM) Index showing strong growth of 13 percent in July'17. As per State Bank of Pakistan (SBP), manufacturing activity is expected to benefit from higher development spending, growing investments in China Pakistan Economic Corridor (CPEC) related projects, improvement in security situation and low borrowing costs. This along with favorable initial estimates of major crops and growth in credit offtake is expected to take the country's Gross Domestic Product (GDP) growth to 6 percent during the current fiscal year FY18 (compared to 5.3 percent during FY17), as per SBP.

The Government managed to bring down budget deficit to 0.9 percent of GDP in first quarter of the current fiscal year from 1.3 percent in the same period last year. This improvement was achieved through better tax collection and lower expenditure, which if maintained will help achieve the annual target of 4.1 percent. Inflation continued to be low in the outgoing quarter and averaged 3.4 percent vs. 3.9 percent in the corresponding period last year. Inflation for FY18 is expected to remain below government's target of 6 percent. During the quarter, trading at the local bourse remained volatile due to negativity led by political apprehensions.

Foreign exchange (FX) reserves of the country declined to US\$20 billion as of 22 September compared to US\$21.4 billion as of June end, down by 6.4 percent. This is because the current account deficit (CAD) increased to US\$2.6 billion during Jul-Aug'17, more than twice the deficit witnessed last year of US\$1.2 billion due to higher imports, which were up 28 percent to US\$9.0 billion compared to US\$7.0 billion last year. The significant rise in imports offset the healthy growth of 18 percent in exports (reported at US\$3.9 billion) and 13 percent in remittances (reported at US\$3.5 billion) during Jul-Aug'17. On the flip side, higher foreign direct investment (FDI) was up 2.5 times to US\$456 million as compared to last year. Improvement in the country's external account will depend upon timely realization of official flows and structural reforms to improve trade competitiveness.

## Directors' Review

The Bank posted profit before tax (PBT) of Rs. 2,099.71 million and profit after tax of Rs. 1,231.35 million for the nine months ended 30 September 2017. This translates into earning per share of Rs. 1.1169 versus Rs. 1.3984 in the corresponding period last year.

The Bank's total revenue (total of net markup income and non-markup income) stood at the same level as last year. It is noteworthy as the Bank managed to sustain the pressure on net markup income line after maturity of high yielding bonds last year. This is a systemic theme across the industry impacting banking results. The focus on low cost deposits and increase in non mark up income offset the negative impact of compressing spreads. The strategy of delivering right growth and managing spreads contained the decline in net mark-up income to 6.73 percent.

Non Mark-up expenses increased by 8.34 percent as compared to corresponding period last year owing mainly to increase of 6 branches in branch network, full year impact of 22 branches opened last year and inflationary impact. The Bank currently has 286 fully operational branches. Eight branches were closed during nine months in view of their limited prospects.

The provision for non-performing loans made in line with the regulatory requirements amounted to Rs. 99.76 million during the nine months ended 30 September 2017 (30 September 2016: Reversal Rs. 20.54 million).

Your Bank's Net assets (including surplus) decreased to Rs. 17.12 billion as at 30 September 2017 from 2016 base of Rs. 18.29 billion as a result of appropriation of 2016 final cash dividend during the first quarter. Deposits grew by 2.34 percent during the period closing at Rs. 214.85 billion (31 December 2016: Rs. 209.93 billion). Net Advances grew by 24.38 percent standing at Rs. 155.85 billion (31 December 2016: Rs. 125.30 billion).

It is with great satisfaction that we inform you that your Bank continues to operate with adequate liquidity and capital adequacy levels and enjoys respectable standing with the international financial institutions. We are confident that with an effective risk management, strong internal controls and compliance systems the Bank will remain satisfactorily compliant with all the regulatory requirements and will continue to maintain the present trend of growth in business and profitability.

#### **Credit Rating**

The Pakistan Credit Rating Agency (PACRA) maintained the long term credit rating of AA- (Double A Minus) and short term rating of A1+ (A One Plus) through its notification dated: 16 June, 2017 [2016: long term AA- (Double A Minus): short term A1+ (A One Plus)]

PACRA has also maintained credit rating of unsecured, subordinated and listed Term Finance Certificates (TFC – 2) issue of worth PKR 3,000 million at A+ (Single A plus) vide its notification dated: 16 June, 2017.

#### Acknowledgment

We would like to take this opportunity to thank the State Bank of Pakistan, the Securities and Exchange Commission of Pakistan and the Ministry of Finance for their continued support and guidance. We are also thankful to our valued customers for their continued patronage and confidence and want to extend our appreciation to the Bank employees as the driving force in the growth of the Bank over the years.

The different levels have been defined as follows:

- Quoted prices (unadjusted) in active markets for identical assets or liabilities (level 1);
- Inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices) (level 2); and
- Inputs for the assets or liabilities that are not based on observable market data (i.e. unobservable inputs e.g. estimated future cash flows) (level 3).

#### 22 CONCENTRATION OF CREDIT AND DEPOSITS

#### 22.1 Credit risk and concentration of credit risk

Credit risk is a risk arising from an obligors' unwillingness to perform an obligation or its ability to perform being impaired resulting in financial loss to the Bank. The Bank regularly monitors credit risk at portfolio levels to ensure no undue concentration of risk is present. The Bank also attempts to control credit risk by continually assessing the credit worthiness of counter parties and obtaining security where appropriate.

Concentration of credit risk arises when a number of counter parties are engaged in similar business activities, or activities in the same geographical region, or have similar economic features that would cause their ability to meet contractual obligations to be similarly affected by changes in economic, political or other conditions. Concentration of credit risk indicates the relative sensitivity of the Bank's performance to developments affecting a particular industry or geographical location. The Bank seeks to manage its credit risk exposure through diversification of lending activities to avoid undue concentration of risks with individuals or groups of customers in specific locations or businesses.
