

WELCOME

a guide to accessibility of Website & Data Portal

Introduction

In Today's world, when smartphones are starting to dominate internet usage over traditional PCs and Laptops it is crucial that website must be available on all devices and must not hinder the reach of a brand to the user.

PSX's new website is readily available on all smart devices such as smartphones, tablets and Laptops. The New website is also up to par with international web layout standards such as the W3 Standard on Web layouts.

It improves on its past performance by integrating high-end technologies, modern API nodeJS Layouts and uses modern Nginx web servers to accommodate a high- number of daily-users.

PSX also bifurcates its user base by creating two different websites **Corporate website & Data Portal**. Corporate website is intended for the average user and gives a short and concise summary of the current market.

The Data Portal provides details of corporate announcements, information market analyses and company financials.
