Directors' Review Report

The Board of Directors of Pakistan Stock Exchange Limited (PSX or the Exchange) are pleased to present the financial statements of PSX for the first-quarter ended September 30, 2023.

ECONOMIC REVIEW & OUTLOOK

Pakistan's economy outperformed its regional peer countries in the post-COVID recovery, led by smart data-driven policymaking and timely financial support from bilateral and multilateral development partners. However, the economic revival was derailed by devastating floods in the summer of 2022 and a balance of payment crisis due to the rising global commodity prices. The floods led to US\$30 billion in damages and economic losses and put rehabilitation and reconstruction costs at over US\$ 16.3 billion.

Political uncertainty, damage caused by floods in 2022, and volatile global commodity markets have severely impacted the economy and livelihoods of millions of households. Headline inflation averaged 29.2% in FY23, compared to 12.2% in FY22. These are the highest levels of inflation ever recorded in Pakistan. GDP growth fell to 0.3% in FY23, compared to growth of 6.1% in FY22. IMF estimates that GDP growth was -0.5%. The manufacturing sector posted a contraction of 10% in FY23, whereas the output of major crops declined by 2.5%.

The government has undertaken important measures to stabilize the economy and build market confidence. The government's stabilization efforts are anchored around the IMF stabilization package. The \$ 3bn IMF Standby Arrangement (SBA) was signed in July 2023, with \$ 1.2bn disbursement under the SBA. This has also led to the disbursement of \$ 3bn in bilateral assistance (KSA \$ 2bn, UAE \$ 1bn). As a result, the SBP FX reserves have increased to \$ 7.6bn (1.5 months of import cover) in September, from \$ 4.5bn (0.9 months of import) in June.

The focus of the government's reform agenda is on reducing the large fiscal deficits and bring down public debt to more sustainable levels. Government is committed to introducing and implementing wide-ranging reforms to broaden our tax base, reduce unproductive spending including untargeted subsidies, and privatization of the loss making SOEs. This includes modernizing the FBR through investments in the digital infrastructure. Reducing the large number of tax exemptions, widening the tax base to include agriculture, retail and real estate activities and simplifying the tax returns for ease of doing business.

The government is focused on creating an enabling environment for growth and new job opportunities for the youth. Reforms have been initiated for ease of doing business and enhancing financial inclusion, especially for women, through rolling out a comprehensive digital infrastructure and digital payments gateway. SBP has issued approvals for 5 Digital Banks in Sept, while RAAST person to merchant (P2M) online payment system has also been launched in Sept. The government is also committed to liberalizing the trade and investment regime, attracting new investment in agriculture, minerals and IT. Towards this end, the caretaker government has removed the import ban that badly impacted the availability of raw materials for the industry. The government has relaxed import restrictions, leading to the opening of L/Cs for imports and the backlog of import payments has now been cleared. Similarly, foreign investors have been allowed to repatriate profits (withheld since 2022), with \$ 49.2mn repatriated during Jul-Aug, an increase of 74%.

The government has taken appropriate actions to stabilize the volatility and speculation in the exchange rate market. Actions taken by SBP on exchange companies and crackdown against illegal transactions have helped to reduce the spreads between interbank and open market. The government is working with the development partners to fast-track the project and program loans from the multilateral institutions (WB, ADB, IsDB, AIIB). Similarly, incentives have been provided to attract higher remittances through the banking channels and have launched the Sohni Dharti initiative, providing Rs 80bn budget allocation to banks to increase remittances, of which Rs 20bn has been disbursed.

These measures have helped to stabilize the economy and bring back confidence in the markets. The bond markets have started to rally, with expectations of a sharp decline in inflation in the year ahead. The PSX has rallied 20% during the calendar year, on strong corporate results and expectations around a rebound in the economy. The IMF forecast that GDP growth will rebound to 2.5% in FY2024 and further to 5% in FY2025.

The PSX continues to create value for both investors and companies seeking to raise capital. The PSX Board is working towards advancing transparency and strengthening governance of PSX.

PSX FINANCIAL AND MARKET PERFORMANCE DURING THE FIRST-QUARTER

As detailed below, despite the challenging operating environment, PSX has continued to invest in and improve the infrastructure, and introduce new products for both investors and listed companies. We are confident that these initiatives will bear fruit in the coming years for the benefit of all stakeholders of PSX and for the growth of capital markets in Pakistan.

PSX recorded a pre-tax profit of PKR 131 million for the first quarter ended September 30, 2023 vs. PKR 55 million for the first quarter ended September 30, 2022, 138% higher than the corresponding year owing to the following reasons:

 Increase in revenue earned from trading activities by PKR 22 million mainly due to higher average daily traded value i.e. PKR 14.7 billion in 1QFY23-24 vs PKR 10.9 billion in 1QFY22-23

- Increase in Other Revenue by PKR 36 million due to no exchange loss recorded in 1QFY23-24 compared to corresponding period.
- Markup income increased by PKR 32 million due to higher rate of return and increase in weighted average fund on receipt of annual listing fee.
- Improved performance of the Associated Companies, which led to a higher share of profit from associates by PKR 47 million.

Management is conscious of the difficult business environment and focused on effective cost management. Consequently, expenses have increased well below the rate of inflation. Total operating expenses of PSX excluding depreciation and amortization, increased by only 19% over corresponding period last year, which is well below the inflation figure of 31.44%.

PSX delivered a post-tax profit of PKR 147 million for the 1QFY23-24 vs PKR 54 million in the 1QFY22-23.

Earnings Per Share (EPS):

The basic and diluted earnings per share is Re.0.18 for the 1QFY23-24 vs. Re.0.07 for the 1QFY22-23.

PSX OUTLOOK

Trading & Investor Developments

Pakistan Stock Exchange (PSX) has taken a significant step forward in offering innovative products and investment opportunities to investors such as the launch of JS Global Banking Sector Exchange Traded Fund (JSGBETF) being the first ETF launched by a Securities Broker at PSX under the SECP's Sandbox Guidelines, 2019, and the eighth ETF listed on the Exchange. JSGBETF tracks the performance of the JS Global Banking Sector Index (JSGBKTI) as its benchmark which is a total-return, equally weighted index. JSGBKTI will be replicating stock selection criteria of PSX's Banking Tradable Index (BKTI).

Further, PSX has taken several initiatives to strengthen and leverage the relationship between banks and brokerage firms including implementation of KYC sharing between banks and brokers, which is expected to significantly improve the client on-boarding process for opening brokerage accounts and is expected to contribute to the growth of the investor base and improve the overall on-boarding experience for investors. Additionally, PSX has made efforts to expand its outreach and become more accessible to retail investors by implementing simplified account opening procedures and documentation for Sahulat accounts along with enhanced exposure limit of PKR 1 million.

IT Achievements and Initiatives

To support the launch of JSGBETF, a number of IT systems were enhanced to accommodate the new ETF and the index that it is tracking. A number of IT systems including the PSX Corporate website, the PSX Data Portal, internal MIS applications and Reporting platforms were subjected to changes to allow the dissemination of trading information for the new ETF and its associated index. The Quotation System that produces the Daily Quotation Report also underwent a change to make visible the trading information of the new ETF and the performance of the related index.

PSX IT-QA team worked closely with the book runner of the Symmetry Group and conducted system familiarization sessions for them prior to commencement of the book building. The IT team also worked in close collaboration with 1Link that provide the framework for automated payments by investors during the IPO. Full IT support was also extended to the Listing team ensuring timely reporting of the transactions and uninterrupted availability of the systems throughout the book building and subscription activity.

Marketing and Business Development initiatives

The Marketing & Business Development team diligently pursued its mission to strengthen the Stock Exchange's presence across diverse platforms with concerted efforts to amplify the Exchange's brand image and equity through strategic business development and marketing initiatives and also maintained an active presence on social media and digital platforms, disseminating posts and infographics across PSX's social media channels.

The Business Development team proactively engaged with small to medium-sized growth enterprises, corporations, and large businesses, with a particular focus on cultivating interest in listing on the GEM & Mainboard of the Exchange. Outreach efforts extended to potential equity and debt issuers, as well as collaboration with Chambers of Commerce & Industries and Associations to elucidate the advantages of listing for capital raising.

Investor Awareness Sessions were conducted across numerous universities, colleges, Chambers of Commerce & Industries, with specific sessions tailored for women. In collaboration with Unilever Pakistan, a webinar session was held that shed light on Unilever's unwavering commitment to sustainability and its initiatives to combat climate change. The other webinar featured an ESG professional addressing "ESG - A Strategic Imperative for Pakistani Companies," offering valuable insights into climate change's implications for Pakistani companies and strategies for a sustainable future. This initiative is aligned with our goal of raising ESG awareness among listed companies.

In line with our efforts to promote listed companies and their accomplishments, several Gong ceremonies were conducted at the Exchange.

Additionally, PSX is currently hosting the "My Portfolio Contest," a virtual trading competition launched in mid-July. Participants receive a virtual cash portfolio of PKR 10 million to invest and trade in shares, with the top-performing portfolios earning rewards. The contest garnered significant interest, with registration reaching its maximum capacity of 1,000 participants. This contest serves as a valuable educational tool for those interested in learning about investments and stock market trading and is set to conclude in October 2023.

Developments in Product Management & Research

PSX is working to launch more Exchange Traded Funds (ETF). In addition to this, PSX is currently working to relaunch the single stock cash-settled futures contract and is also in the process of streamlining the Government Debt Securities (GDS) trading platform. Moreover, exchange is also working on the ESG guidebook for the listed companies that may help listed companies towards their ESG journey. PSX is also in process of establishing a Sharia Focus Group consisting of prominent Sharia scholars and practitioners to help PSX in developing Sharia-compliant products.

BOARD OF DIRECTORS

During the period under review, no change has occurred on the Board of Directors of PSX.
