Rule Book

Of

Pakistan Stock Exchange Limited (PSX)

Updated on March 31, 2021

FOREWORD

The Rulebook of PSX was first introduced in 2014 by compiling different sets of regulations in to the dedicated chapters, which was a strategic step taken by PSX pursuant to corporatization and demutualization of stock exchanges, at par with other regional and global stock exchanges.

It is a matter of pride that the Rulebook of PSX has been harmonized with and re-introduced under the Securities Act, 2015 and Futures Market Act, 2016. The harmonization was necessary to maintain consistency of laws across the securities market while ensuring that the redundancies are removed and any overlapping and inconsistencies are addressed. The revised Rulebook will facilitate the market participants and other readers in easily understanding the regulatory provisions in the context of applicable provisions of primary laws.

I would like to acknowledge the contribution made and cooperation extended by the Securities and Exchange Commission of Pakistan, the Board of Directors of PSX, the Regulatory Affairs Committee and the management team of PSX in achieving this milestone.

Sulaiman S. Mehdi
Chairman, PSX

FOREWORD

PSX traces its history back to 1949, and is one of the oldest markets in Asia. Over the years it has provided excellent investment opportunities and returns to long term investors. PSX aspires to be a world class exchange for Pakistan and has a robust and progressive regulatory framework in place.

In addition to the regulatory framework, which is in line with international best practices, PSX, and its associated capital markets organizations, have invested heavily in technology and operational capabilities. We are presently in the process of implementing a new, state of the art, trading and surveillance system. This will create a strong foundation for a fair, transparent and efficient marketplace, which will benefit investors, issuers and all other stakeholders.

It gives me immense pleasure to re-introduce the Rulebook as framed under the Securities Act, 2015 and Futures Market Act, 2016. This will help everyone connected with the capital markets to access the regulations with ease in one place. This exercise has also helped us to remove any redundant, contradictory and overlapping regulations. We hope that this will be of benefit to all stakeholders and make it easier to access the regulations.

I would like to congratulate and acknowledge the team work of the Regulatory Affairs Division, PSX management, Regulatory Affairs Committee, the guidance & supervision of the Board of directors of PSX, and the Securities and Exchange Commission of Pakistan in achieving this milestone.

Farrukh H. Khan
Managing Director & CEO, PSX

FOREWORD

A fair, efficient and transparent regulatory system of the securities market is an important source of sustaining trust and confidence of the market participants in the capital market. A vibrant regulatory eco-system in this regard is immensely important for any stock exchange and PSX, following the same footprints, always strive to adopt to the changing regulatory dynamics and strengthen the regulatory and compliance regime for fair and transparent operations of the securities market.

The Securities and Exchange Commission of Pakistan (SECP) introduced the Securities Act, 2015 and Futures Market Act, 2016 with an aim to effectively regulate and supervise the securities market activities with an ultimate objective to ensure enhanced protection of rights of investing public at large.

The above developments necessitated a comprehensive review of the regulatory framework of PSX to identify the gaps and inconsistencies and address the same through appropriate amendments to ensure harmonization. Besides harmonization, PSX also endeavored to concise the regulations by addressing redundancies and removing obsolete provisions and adding clarity wherever felt appropriate.

The Rule Book is divided into 24 dedicated chapters, which has turned out to be a handy regulatory document for the regulated entities of PSX and stock market investors in terms of understanding the requirements, rights and obligations as well as recourse available to investors in case of dispute.

Our goal shall remain to continuously evolve the sound regulatory environment that promotes market integrity and fairness in capital market operations.

Abbas Mirza
GM & Acting Chief Regulatory Officer, PSX

- (d) Earnings Multiplier approach (for profitable companies)
- (e) The maximum price at which the Sponsors had purchased these shares from the open market in the preceding one year.

Explanation:

Intrinsic value per share:

The intrinsic value per share will be determined on the basis of revaluation of assets, carried out by professional evaluator approved by Pakistan Banks' Association (PBA), any Investment Bank or Valuers having relevant expertise and duly certified by the Chartered Accountant Firms falling in Category 'A' or 'B' specified by SBP. The revaluation of assets carried out by the evaluators shall not be older than three months from the date of completion of documents/information required to be submitted by the applicant company with the formal application under the Regulations. The intrinsic value may also include any other factor in addition to tangible and intangible assets of company, which may be considered appropriate by the Exchange, while fixing the price of shares.

Earning Multiplier approach (for profitable companies):

A profitable company is a company that declares an after tax profit for the three years preceding the date of the notice under Regulation 5.14.1 as reported in its annual audited accounts.

Fair value = Estimated Earnings * P/E ratio:

Estimated earnings should be arrived at using the weighted average earning per share of the last three years audited accounts. For this purpose, higher of, weights of 45%, 35% and 20% assigned to preceding three years respectively or latest earning per share should be used. The P/E ratio to be used should be of the date the Exchange receives the notice under Regulation 5.14.1.

The basis of this approach is that a stock's current price is the product of its actual earnings per share and the P/E ratio. The P/E ratio is calculated by dividing the current price by the actual earnings per share. To determine the value of stock, both the earnings and the P/E ratio will have to be estimated.

Price will be determined as a multiple of the P/E ratio of the related sector as on the date of application for the voluntary buy-back of shares. Earnings per share will be based on the latest audited accounts of the companies in that sector or a weighted average earning per share of last 3 years of those companies.

Average Market Price:

Daily Closing Price of the Security in three years preceding the date the Exchange receives the notice under Regulation 5.14.1 should be used to calculate the Average Market Price.

Once trade occur in the open state the first trade price shall become the Opening Price of the scrip with the exception that the first trade shall not be Cross Trade in nature.

- 8.15.5. **Opening Price Calculation:** The Opening Price for scrip is determined by a four step approach involving the use of conditional decision rules. If a clear result cannot be achieved when the first decision rule is applied, the mechanism progresses to the second decision rule and so forth. The decision rules are applied in the order provided hereunder.

Each symbol has only one Opening Price. The Opening Price is calculated based on the available orders in the regular book. To calculate the Opening Price, the following rules are applied:

- i. At each price level the total volume available in the market is calculated. The total volume available is determined separately for both buy and sell side of the market. The price level that allows the maximum volume of shares to trade is the Opening Price.
 - ii. If more than one price level allows the maximum volume of shares to trade then the price level that has the minimum imbalance in share volume shall become the Opening Price. Imbalance in share volume is the number of shares remaining after all trades occur at a particular price level.
 - iii. If more than one price level allows the maximum volume of shares to trade and have an equal minimum imbalance in share volume, then the price level with the least net change from the Closing Price of previous trading day or from last trade price of previous trading session, whichever is applicable, shall become the Opening Price.
 - iv. If more than one price level allows the maximum volume of shares to trade, have an equal minimum imbalance in share volume, and have an equal least net change from the previous trading day Closing Price or last trade price of previous trading session, then the highest price level shall become the Opening Price.
- 8.15.6. **Orders Not Completely Filled:** All Orders entered during the Pre-Open Session will have a time priority based on the actual time of entry. For Orders not completely filled at the Pre-Open, this time priority will be maintained thereafter during the trading day and in case of Friday, the trading session. Limit Orders entered during the Pre-Open are subject to the same procedures that govern their entry during the trading day.
 - 8.15.7. **Open Session:** After the completion of Order Matching and Confirmation Period the Open Session will commence for regular trading activity subject to these Regulations.

Notwithstanding anything contained above, all Orders entered during Order Entry Period that remain unfilled during Pre-Open session shall not be cancelled/modified for three minutes immediately after start of the Open Session or for such time period as specified by the Exchange with prior approval of the Commission from time to time.
 - 8.15.8. **Frozen Trades:** The Exchange can define parameters that can cause any trade that violates them to be "frozen" so that it can be examined before the Exchange decides to allow it or prevent it. This is based on things such as a drastic change in the trade price or an extremely high volume. The monitoring that takes place during the trading day is also in effect during the open. Any trade that violates freeze parameter at the open will result in a freeze. All the trading done for the open of the current Security is placed on hold until the Exchange decides how to proceed. Only the specific Security is frozen.

8.16. HALTS:

- 8.16.1. Trading in each Security can be halted on demand by the Exchange.

- If the cumulative volume in a Security is at least 500 shares or Rs. 25,000/-, whichever comes earlier (here in after referred to as the "threshold") then the Closing Price of that Security shall be determined as Volume Weighted Average (VWA) price of trades of last 30 minutes before closing of the market.
 - If the cumulative volume in a Security during last 30 minutes before closing is less than the threshold, then the Closing Price of that security shall be determined as VWA of the most recent executed trades during the day which constitute the threshold.
 - If cumulative volume is less than the threshold or there is no volume in the Security during the whole trading day, then Closing Price shall be the VWA of executed trades and either all bids or all offers entered in KATS during the whole trading day. Such VWA price must be better than the previous day's Closing Price, provided that:
 - Cumulative volume of either all bids or all offers entered at order level and executed trades are equal to or greater than the threshold.
 - Such bids or offers are entered in KATS at least two hours before the market close and remained unchanged during such period.

- (b) The Theoretical Price for a Security tradable under Deliverable Futures Contract and/or Cash-Settled Futures Contracts Markets, if there is no trading in such Security in the respective market during whole trading day, is determined as per following methodology:
